

# Brian Miller Magic

**Brian Miller** is an entertainer known for having a stand-up comic's perspective on the art of magic. He isn't afraid to inform his audiences that he lies for a living. After all, it's the truth!

He also has obnoxiously large eyebrows, to which he credits his success as a magician: *"I never had to learn misdirection. My eyebrows do that for me."*

Miller is an internationally recognized creator of original magical ideas, and the resident magician at COMIX at Foxwoods Resort Casino, the largest casino in North America.

Brian is also a two-time nationally award winning amateur philosopher in the field of metaphysics, the discipline which studies the nature of reality.

In the words of Brian's brother Michael, "Brian is powerful; very powerful indeed. He can bend the rules of life."

Enough said.
